Make An Origami Turkey!

Follow the steps to make an origami turkey! All you need is a square of paper.

1. Fold your paper in half diagonally. Unfold so you can see the crease.
2. Fold the left and right lower edges to the center crease.
3. Fold the top point down on top of the flaps.
4. Tuck the top flap underneath the large flaps.
5. Flip the paper to the other side.
6. Fold the left and right corners down, aligning with the center crease.
7. Unfold the corners and flip the paper over.
8. Pull the top right corner out and down into a squash fold - see Ms. Westman or reference origami books for help!
9. Repeat with the top left corner.
10. Fold the left and right flaps outward diagonally to align with the creases underneath.
11. Fold the bottom of the flaps down as shown.
12. Fold the right side of the model over to the left, sandwiching the "legs" inside.
13. Rotate and fold to create creases as shown.
14. Create reverse folds on the two creases - see Ms. Westman or reference origami books for help!
15. Fold over the longer side to make a crease for the turkey's head.
16. Reverse fold that crease to make the turkey's head.
17. Make a crease at the end of the head for the beak.
18. Inside reverse fold that crease to form the beak.
19. You're done! Decorate your turkey.

Happy November and happy folding!
