Duct Tape Bows & Bow Ties

1. Cut a piece of duct tape that is approximately 9 inches long.

2. Fold the ends in so they overlap slightly. Your piece should now be about 4 inches long.

3. Fold the piece 3 times accordion style. Cut a small strip of tape and fold over edges leaving a sticky center.

4. Wrap the small piece of tape around the center to make a bow! Attach to a paperclip, headband, or string!
